

DISCRETE MATHEMATICS
VOLUME 129, NUMBERS 1–3, 28 May 1994

CONTENTS

First International Conference on Linear Spaces	1
<i>P. Biondi</i>	
A classification of finite $\{n-2, n\}$ -biregular spaces	3
<i>F. Buekenhout</i>	
Questions about linear spaces	19
<i>P. J. Cameron</i>	
Infinite linear spaces	29
<i>P. De Vito and P.M. Lo Re</i>	
On some classes of linear spaces embedded in a Pappian plane	43
<i>A. Del Fra and D. Ghinelli</i>	
$Af^*.Af$ geometries, the Klein quadric and \mathcal{H}_q^n	53
<i>A. Delandtsheer</i>	
Classifications of finite highly transitive dimensional linear spaces	75
<i>H. Gropp</i>	
Configurations and $(r, 1)$ -designs	113
<i>H. Hotje, M. Marchi and S. Pianta</i>	
On a class of point-reflection geometries	139
<i>A. Maschietti and G. Migliori</i>	
On $q^2/4$ -sets of type $(0, q/4, q/2)$ in projective planes of order $q \equiv 0 \pmod{4}$	149
<i>S. Milici and Z. Tuza</i>	
The spectrum of λ -times repeated blocks for $TS(v, \lambda)$	159
<i>C.A. Rodger</i>	
Linear spaces with many small lines	167
<i>M. Stroppel</i>	
Stable planes	181
<i>G. Tallini</i>	
Asymptotic questions in Galois geometries	191
<i>J. Ueberberg</i>	
Symbolic incidence geometry and finite linear spaces	205
<i>A.A. Bruen</i>	
Solution to a question of A. Beutelspacher on finite linear spaces	219
Research problems	221
Author index to volume 129	227
